Re: the “-130B” designation on Tamura PL Series Power Transformers

In approx. 1998, Tamura Corporation began marking our PLxx Series International Power Transformer Products with a “**130B**” mark. This indicates that the Product is , in addition to UL506, UL1950, UL1411, and VDE/IEC Specifications, approved to a UL Class B 130 Deg. C Insulation System. Tamura UL File # **E92957**. The change is a paper work change, only. The product maintained the same Construction materials and process, as before. The new recognition simply certifies the higher temp rating , as designated in Tamura’s Insulation System.

This applies to the PL2.5-xx, PL5.0-xx, PL10-xx, PL20-xx, PL30-xx, PL56-xx, PLT20-xx, PLT30-xx and PLT56-xx series Catalog Products from Tamura Corporation.
